CENTRAL MONITORING SYSTEM (CMS)

Advanced monitoring and analytics for renewable energy portfolios

AEPL's Centralized Monitoring System (CMS) provides real-time visibility and intelligent analytics for Solar, Wind, and BESS assets, enabling centralized monitoring, performance optimization, and efficient management of renewable energy portfolios.

"Enterprise-Level Monitoring and Portfolio Intelligence"

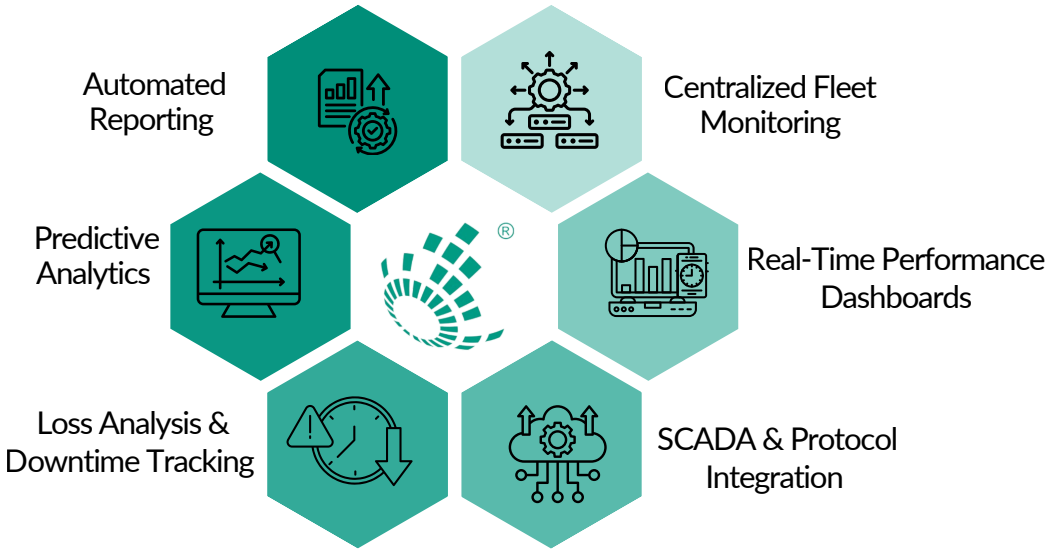

16+	68GW+	500+	300+	1000+
Years Experience	Installed Base	Satisfied Customers	Manpower	Sites Monitored

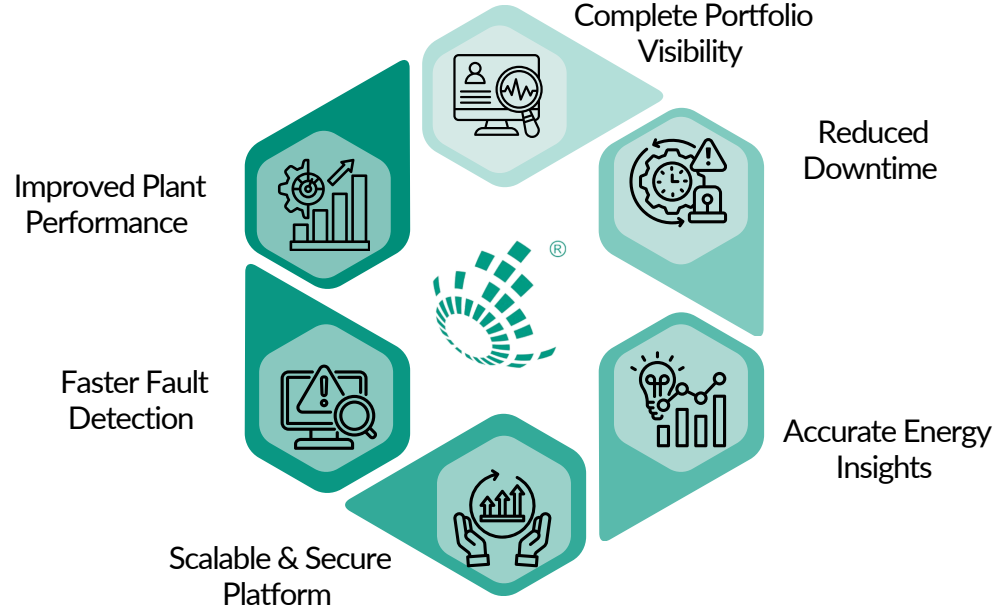

AEPL's Centralized Monitoring System (CMS) provides real-time monitoring and analytics for Solar, Wind, and BESS assets across multiple sites. The platform integrates plant-level data into a unified system for centralized performance visibility. Advanced dashboards and analytics help operators quickly identify issues and optimize plant operations. Automated reporting and secure data management support efficient, scalable renewable portfolio management.

Key Features

Key Benefits

Adaptive Engineering Pvt. Ltd.

RESULT ORIENTED ■ SERVICE DRIVEN

DESIGNED FOR THE FUTURE ENERGY ECOSYSTEM

- **Handles renewable complexity:** Manages large-scale solar, wind, and hybrid assets across multiple locations
- **Ensures operational transparency:** Provides real-time insights into plant performance and equipment health
- **Advanced analytics:** Detects performance losses, inefficiencies, and operational risks
- **Secure data architecture:** Cyber-resilient monitoring with encrypted communication and role-based access
- **Flexible deployment:** Supports both cloud and on-premise installations
- **Future-ready platform:** Easily integrates new plants, technologies, and energy storage systems

GAIN SUPERIOR CONTROL WITH AEPL CMS

- Centralized portfolio monitoring
- Real-time plant performance visibility
- Advanced analytics & loss bucket analysis
- Predictive maintenance & anomaly detection
- Automated reporting & data intelligence
- Cross-plant benchmarking & asset comparison
- Enterprise dashboards for management
- Secure Data infrastructure
- Cybersecurity
