Adaptive Engineering Pvt. Ltd.
RESULT ORIENTED ▪ SERVICE DRIVEN

CASE STUDY

WATER TREATMENT PLANT (WTP)

INDUSTRY - WATER
CUSTOMER - DILIP BUILDCON LIMITED

OBJECTIVE

To Maximise Profits from Machines, Processes, and Plants.

Adaptive Engineering Pvt. Ltd.
RESULT ORIENTED ▪ SERVICE DRIVEN

CHALLENGES

1. Real-time monitoring and auto operation of treatment plants
2. Minimizing wastage and maximizing water purity
3. Implementing automatic filter bed cleaning operations
4. Logic-based valve operations and water quality monitoring
5. Ensuring continuous and reliable water distribution
6. Managing water treatment system operations effectively
7. Sequenced and demand-based operation of pumping systems and valves
8. Monitoring water storage, gravity flows, and water quality
9. Implementing a flexible system for trending, logging, display, security, and alarms
10. Automating various components including inlet pits, wastewater collection basins, air blowers, pumps, and dosing systems

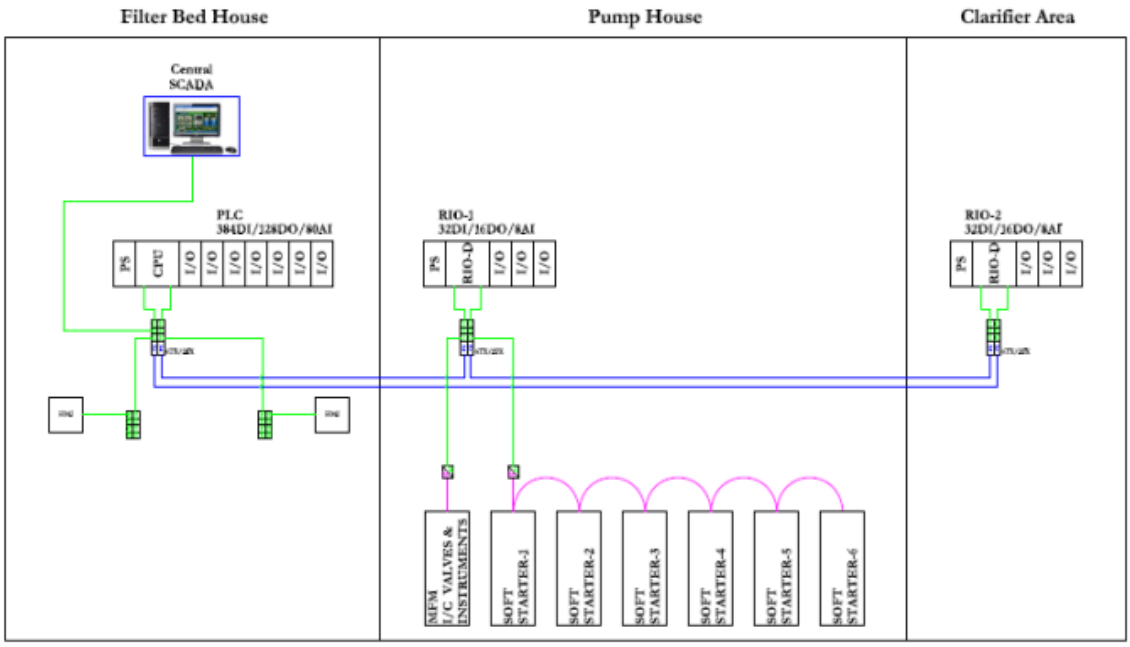

Adaptive Engineering Pvt. Ltd.
RESULT ORIENTED ■ SERVICE DRIVEN

SOLUTION

1. Comprehensive monitoring of water distribution networks
2. Automatic operation of water treatment systems
3. Sequenced and demand-based operation of pumping systems and valves
4. Monitoring and control of ESR water storage, gravity flows, and water quality
5. Automation of key components such as inlet pits, wastewater collection basins, air blowers, pumps, and dosing systems
6. Customizable user-defined operation philosophy and printable reports
7. Efficient Excel-based reports for data analysis
8. Flexible system for trending, logging, display, security, and alarms

ARCHITECTURE

Adaptive Engineering Pvt. Ltd.
RESULT ORIENTED ▪ SERVICE DRIVEN

BENEFITS

- ✓ Comprehensive operation facility with trending, data logging, display, security, and alarms
- ✓ Customizable user-defined operation philosophy and printable reports
- ✓ Efficient Excel-based reports for data analysis
- ✓ Reduced downtime through automated operations
- ✓ Cost-effective system for efficient water treatment processes
- ✓ Ensured quality of recycled water
- ✓ Enhanced safety measures through automation
- ✓ Reduced manpower costs through automation
